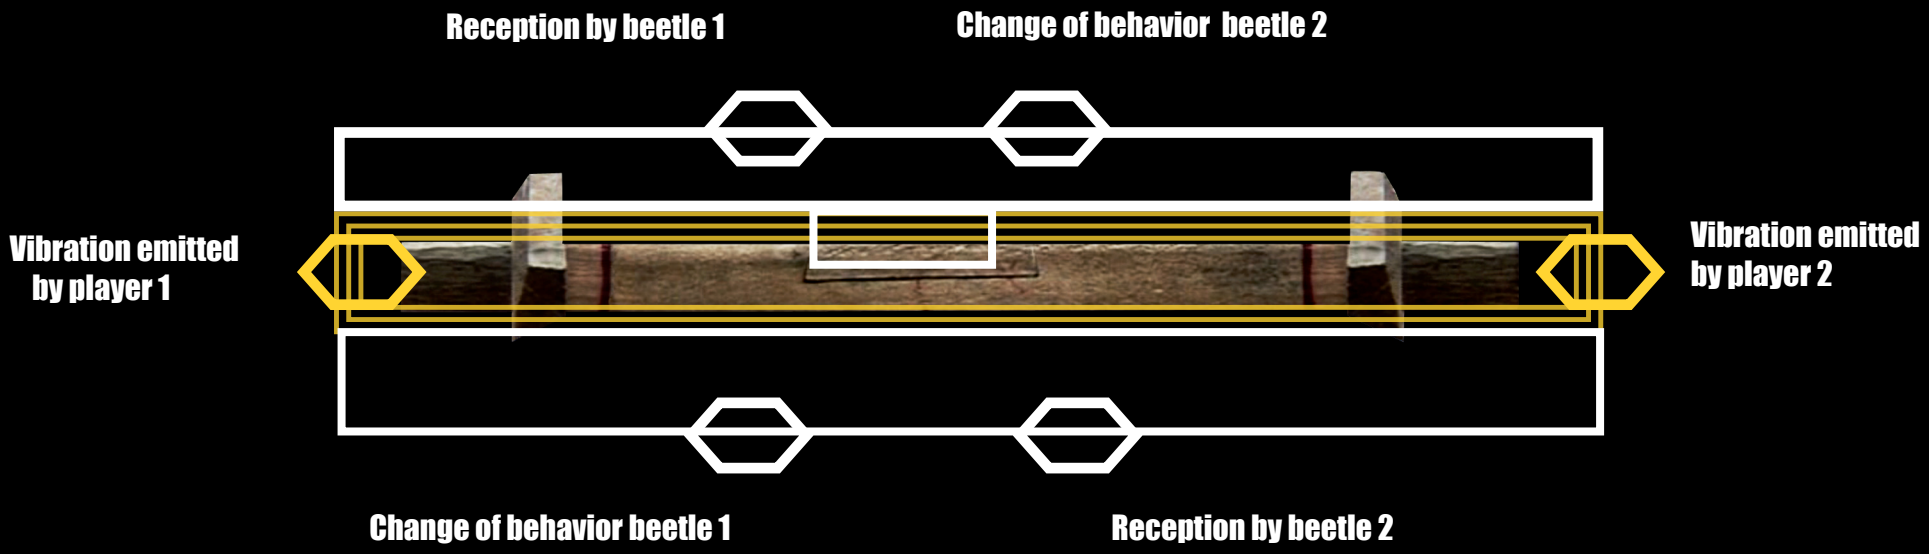
VIBRATORY FIELD

Electrical Models - transmission of intensity

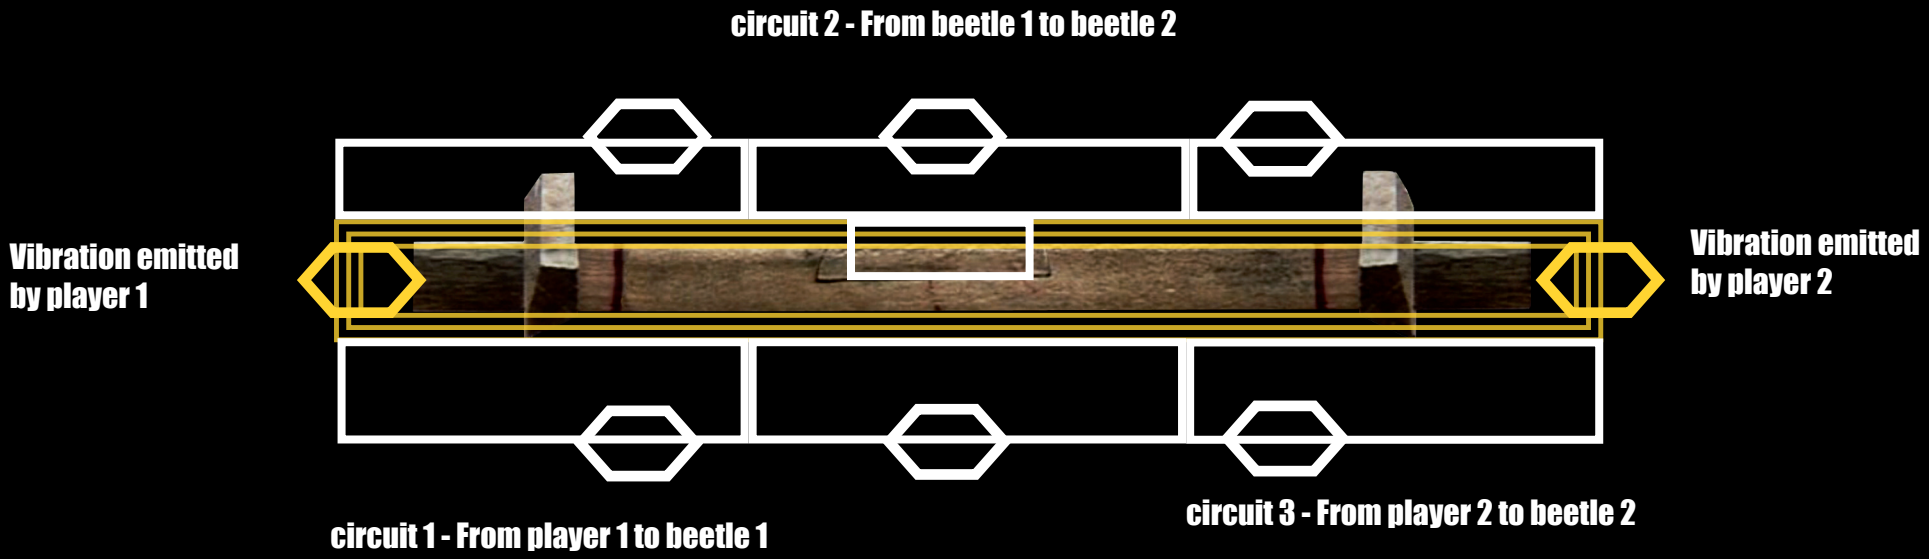
connection in series ?



a connection in series would suppose the transmission of a non variable intensity

Electrical Models - transmission of intensity

connection in parallel ?



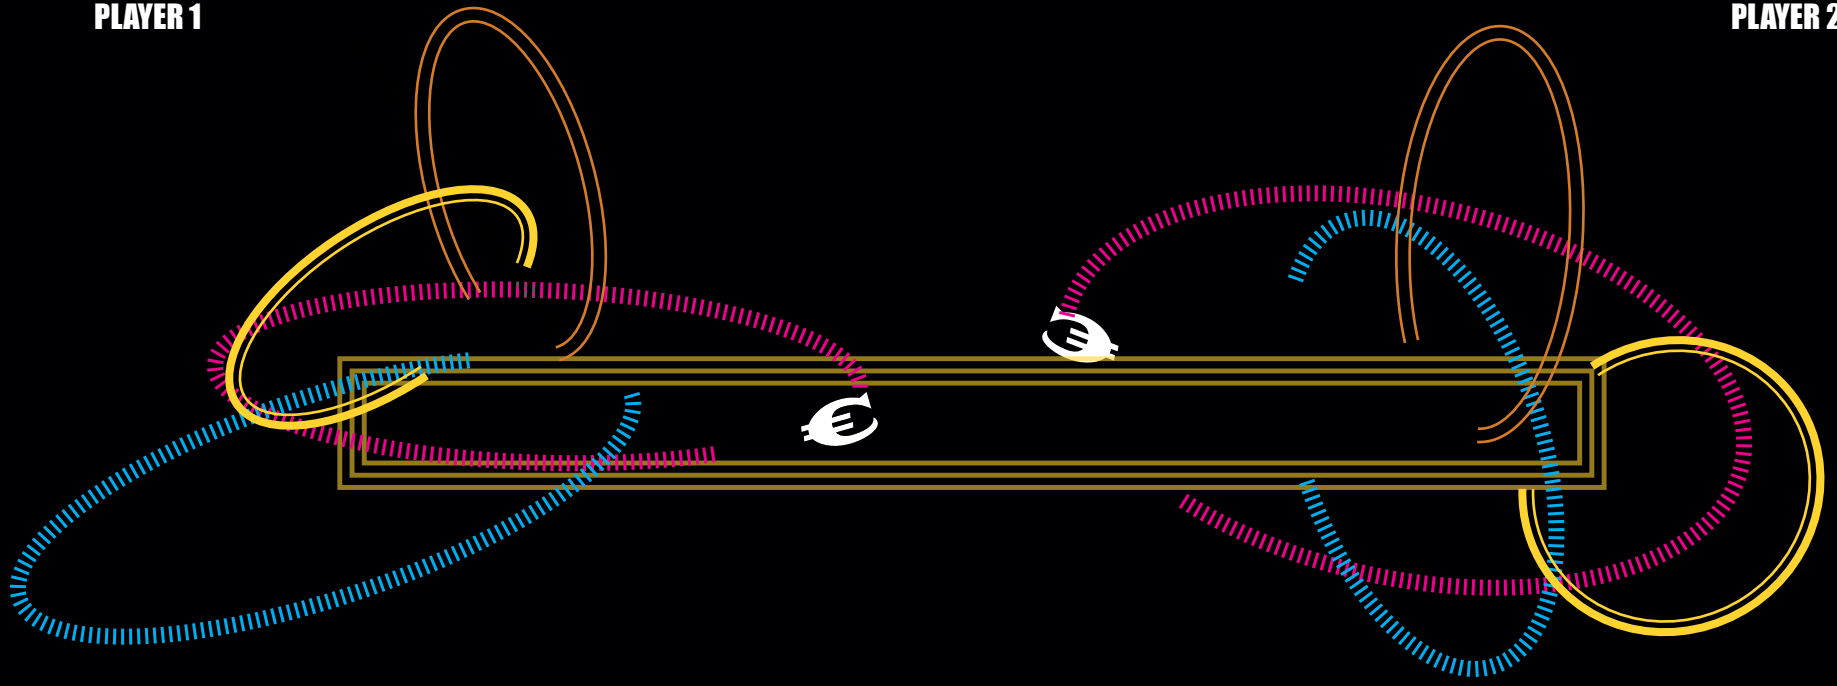
A connection in parallel would suppose an accumulation of intensity

VIBRATORY FIELD

connections + conductivity

PLAYER 1

PLAYER 2



Direct contact

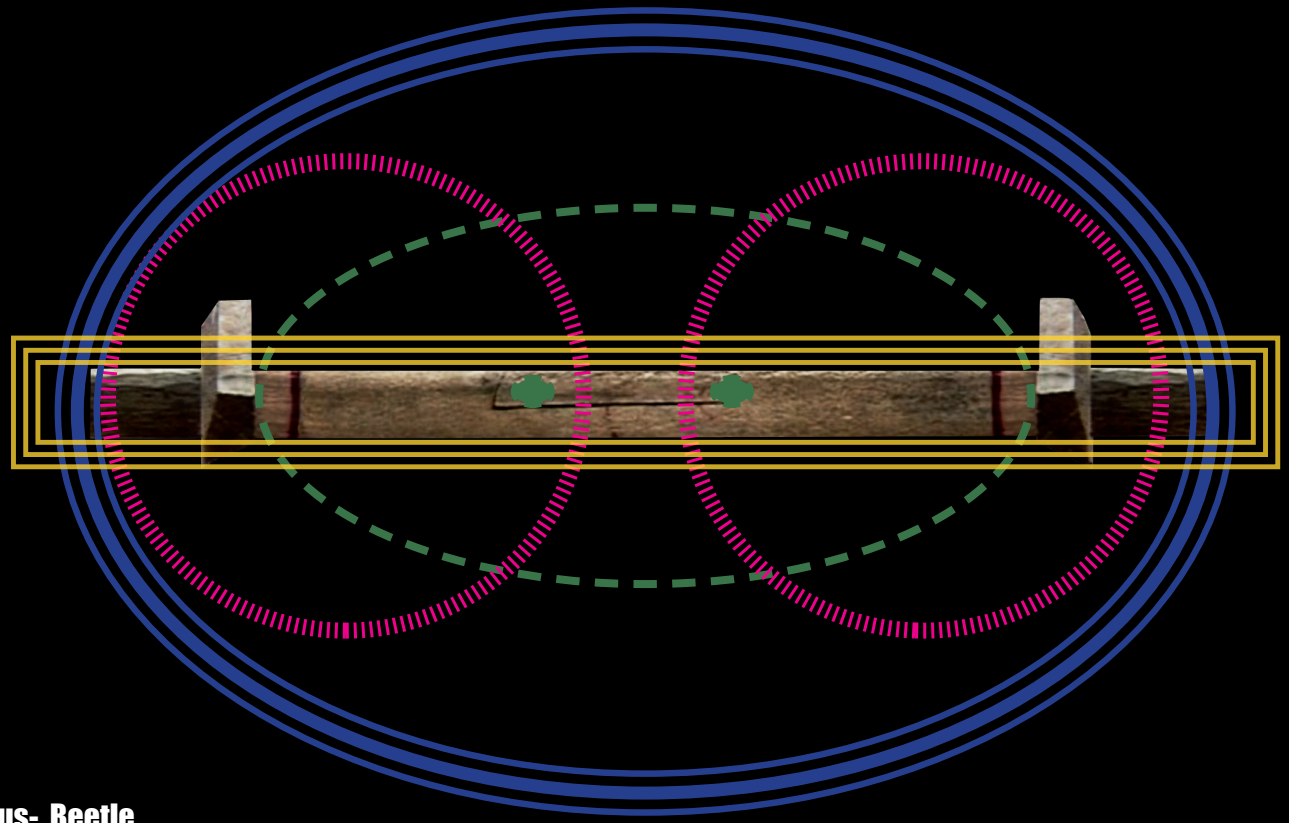
Stylus striking against the log

Stylus rolling

Log manipulation

Log as conductor

VIBRATORY FIELD a circuit made of 5 loops



Player - Stylus- Beetle

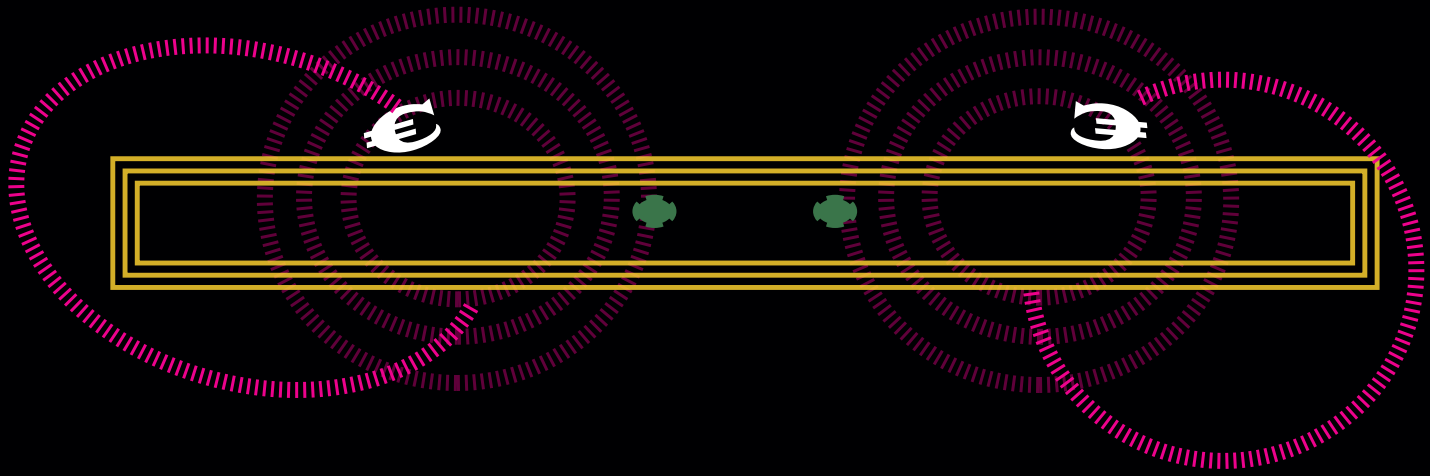
Player 1 - Player 2

Beetle 1 - Beetle 2 + females

Log as conductor

VIBRATORY FIELD phase I

Establishing contact



Player - Stylus - Beetle

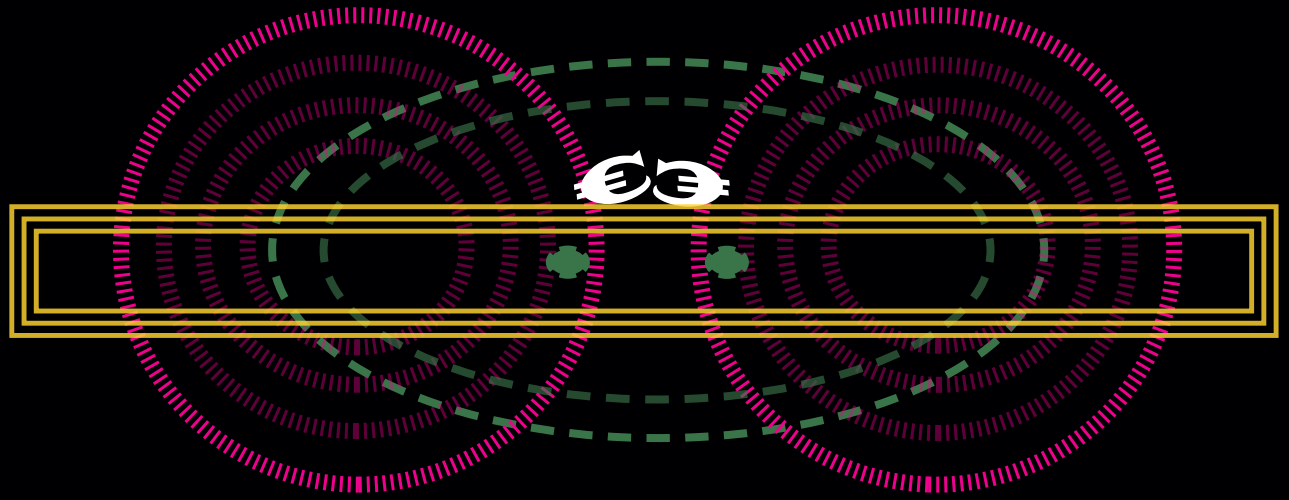
Player 1 - Player 2

Beetle1 - Beetle 2

Log as conductor

VIBRATORY FIELD phase 2

Managing contact - stylus and striking



Player - Stylus - Beetle

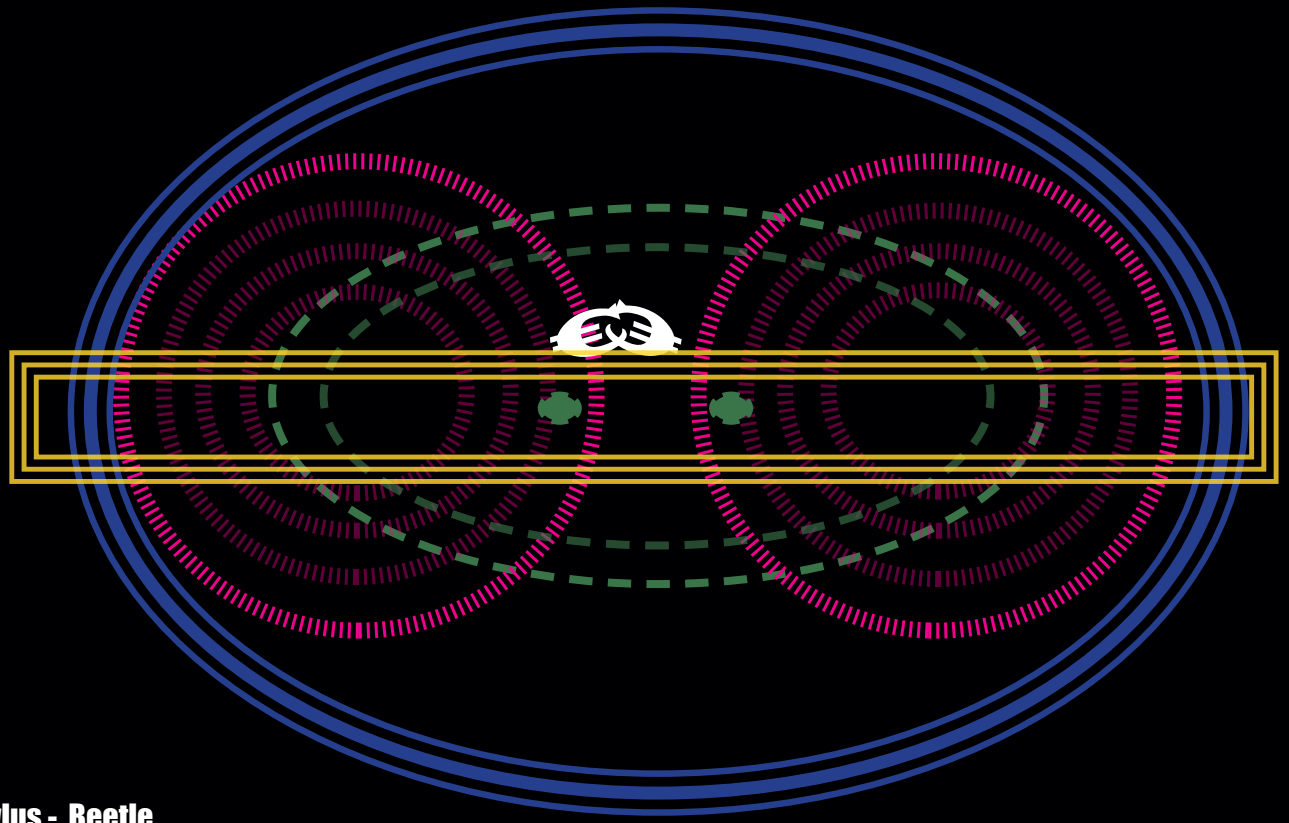
Player 1 - Player 2

Beetle1 - Beetle 2

Log as conductor

VIBRATORY FIELD phase 3

Manipulating the log



Player - Stylus - Beetle

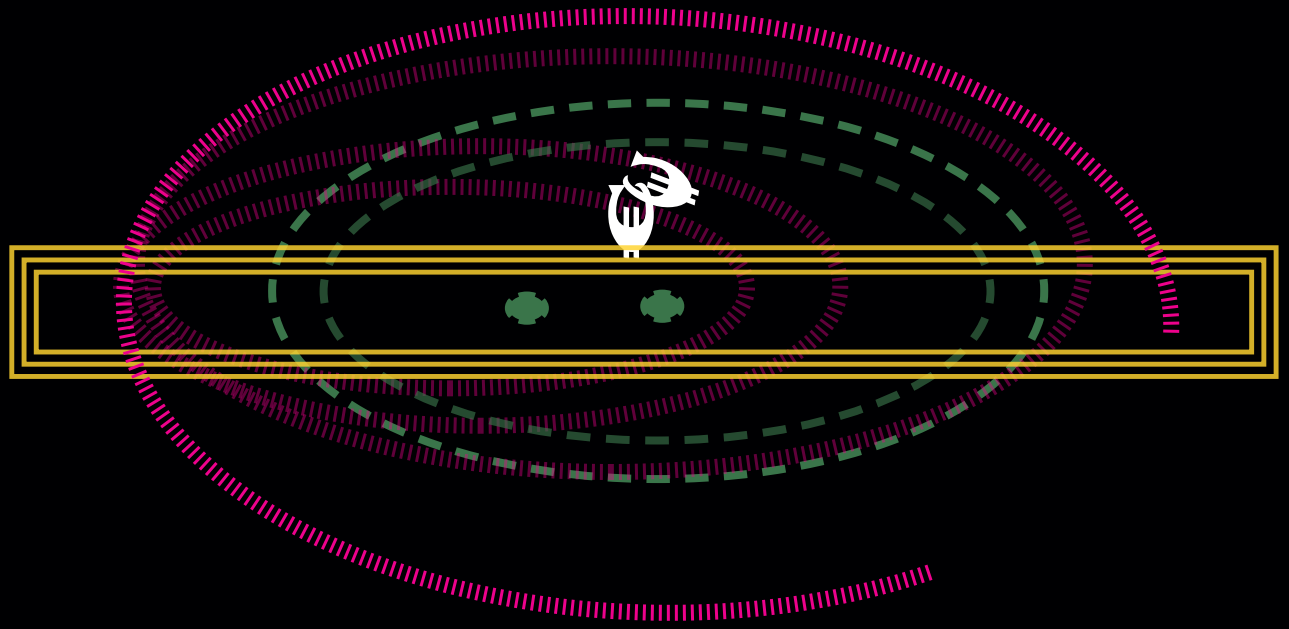
Player 1 - Player 2

Beetle1 - Beetle 2

Log as conductor

VIBRATORY FIELD phase 4

Player 1 has the upper hand
Loss of contact by player 2



Player - Stylus - Beetle

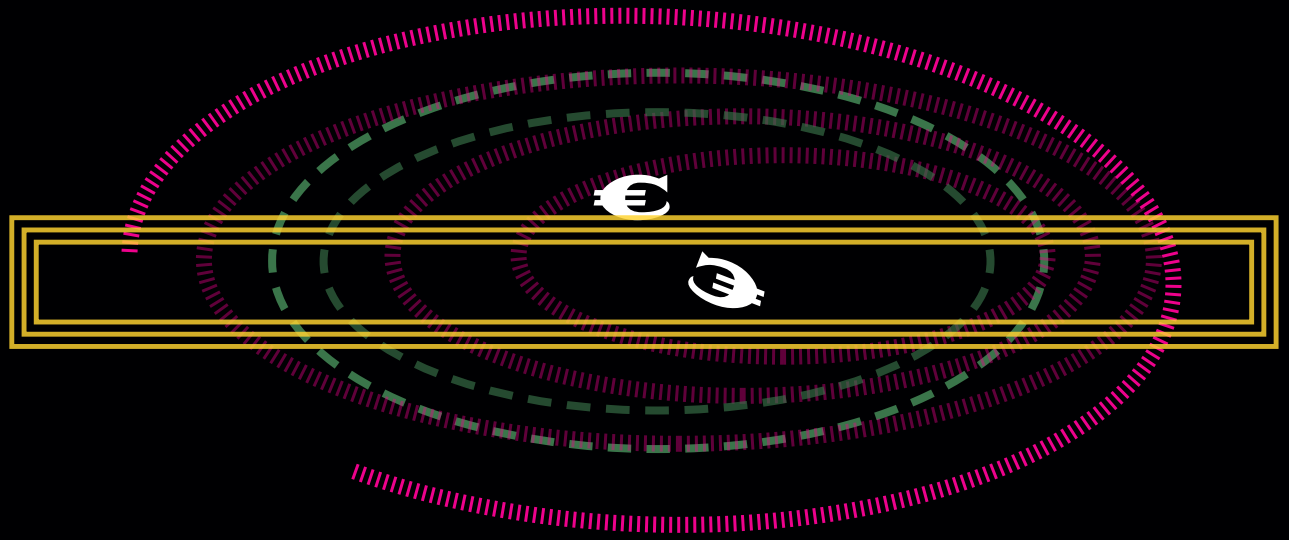
Player 1 - Player 2

Beetle1 - Beetle 2

Log as conductor

VIBRATORY FIELD phase 5

Player 2 regaining contact
Player 1 losing the upper hand



Player - Stylus - Beetle

Player 1 - Player 2

Beetle1 - Beetle 2

Log as conductor
